NEVIS supports Securosys HSM

Zurich, March 21, 2018 – AdNovum's NEVIS Security Suite now supports the hardware security modules (HSM) of the Swiss HSM provider Securosys. Securosys' quality products are developed and manufactured in Switzerland. They ensure an absolutely secure generation, storage and administration of keys and certificates.

AdNovum's NEVIS Security Suite now supports the hardware security modules (HSM) of the Swiss producer Securosys. The HSM can thus be used to generate, store and administrate keys and certificates in NEVIS infrastructures.

Securosys' HSM are developed, built and tested exclusively in Switzerland. The company attaches great importance to a secure supply chain while adhering to the highest security standards to prevent the installation of backdoors. *In addition, Securosys' HSM devices are characterized by their top performance, which is why they qualify for use, among other things, by organizations and companies in the government, finance and insurance sectors.*

Just like AdNovum, Securosys focuses on long-term business relationships, reliability, innovation strength and highest Swiss quality standards. This makes Securosys' HSM products an ideal complement to the NEVIS Security Suite. NEVIS is Switzerland's market leader for identity and access management and protects over 80 percent of all e-banking transactions. Securosys' HSM, in turn, are used in the Swiss interbank clearing system SIC4, to which all Swiss financial institutions are connected. SIC4 is operated by SIX and supervised by the Swiss National Bank.

Win-win to the benefit of the customer

Stephan Schweizer, Chief Product Officer NEVIS: «We are very pleased about the cooperation with Securosys, as their HSM are a perfect match to the products of the NEVIS Security Suite. The whole is more than the sum of its parts – by combining our products, customers profit from the highest possible level of security.»

Dr. Robert Rogenmoser, founder and CEO of Securosys: «The fact that NEVIS supports our HSM products provides added value with tremendous potential. NEVIS is a perfect match to our HSM in terms of quality and ease of use. We are convinced that our cooperation will strengthen the position of both companies.»

Securosys

Securosys is a Zurich-based Swiss technology company. It develops, produces and distributes hardware, software and services that protect and verify data and their transmission. In addition to the HSM, Securosys' portfolio includes related solutions such as HSM as a Service and link encryptors. Securosys develops, programs and builds its products in Switzerland and with vested partners in Europe. The company's customer base includes SMEs and major enterprises from the banking and insurance industry and governments. Securosys was founded in 2014 and is fully owned by Securosys Management and private Swiss investors.
